

UNTH - THEATRE COMPLEX

Office of the Director, Theatre Complex

University of Nigeria Teaching Hospital (UNTH), Ituku-Ozalla, Enugu

OFFICIAL ANNOUNCEMENT

GO-LIVE: Mandatory Use of the ORM Platform for All Surgical Bookings

Effective: Monday, 8 June 2026

To: All Heads of Department, Consultants, Resident Doctors, Anaesthetists, Theatre Nurses, Perioperative Staff & Allied Units
From: Office of the Director, Theatre Complex
Date: 5 June 2026

1. Effective Date

With effect from Monday, 8 June 2026, ALL surgical bookings - elective and emergency, across every surgical unit - MUST be made on the ORM Platform. Paper booking lists and informal WhatsApp/phone bookings will no longer be accepted by the theatre, anaesthesia team, or pharmacy.

2. What Changes on 8 June 2026

A. Surgical Bookings

- Every case must be booked on the ORM platform by the requesting surgical team.
- The system will automatically: assign the on-duty anaesthetist from the duty roster; notify the theatre nurse-in-charge and the pack provider; generate the surgical pack list, anaesthetic prescription and pharmacy shopping list.

B. Surgical Consumable Packs - Patient Payment Flow

1. Patients and their relatives will be directed to the Surgical Pack Consumable Shop located: UPSTAIRS, BESIDE THE FCMB ATM, AT THE OFFICE CLOSE TO THE FORMER DA OFFICE.
2. At the shop, the patient pays for the surgical consumable pack for the scheduled procedure.
3. The cashier issues an official Evidence of Payment (receipt).
4. The patient or a member of the surgical team presents this Evidence of Payment at the theatre to collect the packed consumables - already pre-packed and waiting based on the ORM booking.
5. No payment is to be collected at the theatre itself. Theatre staff will only release consumables against a valid Evidence of Payment.

C. Anaesthetic Prescriptions

- All anaesthetic prescriptions raised on ORM are wired automatically to the Pharmacy.
- The pharmacy prepares and dispenses the prescribed drugs the night before / morning of surgery.
- The surgical team will collect the dispensed drugs along with the consumable pack in the theatre.

3. Why This Change

- One single source of truth for every booking - no double-booking, no missing patients.
- Faster theatre turn-around - packs and drugs pre-staged before the patient arrives.
- Transparent payments - patients pay at a clearly identified office, with a printed receipt.
- Automatic alerts to the on-duty anaesthetist, nurse, pharmacy and pack provider.
- Full audit trail for every consumable used and every drug dispensed.

4. Action Required of Each Unit

HoDs & Consultants	Brief your unit; confirm every team member has an ORM login.
Residents / Booking Officers	Practise booking on ORM this week - support is available.
Anaesthetists	Ensure your roster is current; verify your account can raise prescriptions.
Theatre Nurses	Confirm the consumable catalogue for your specialty is correct on ORM.

Pharmacy	Confirm the wired-prescription queue is being monitored daily.
Pack Provider / Allied units	Ensure your portal account is active and notifications enabled.
Patients & Relatives	Will be directed by surgical teams to the Pack Shop (upstairs, beside FCMB ATM, near former DA office) for payment.

5. Login & Support

- Platform: ORM Theatre Management System
- Login issues / training: contact the Theatre IT desk or the System Administrator.
- Hands-on training: Friday 5 June & Saturday 6 June - venue circulated by your HoD.

6. Compliance

From 8 June 2026, any case NOT booked on ORM by 08:00 of the surgery day will be DEFERRED until properly entered. This protects patient safety, ensures correct staffing and guarantees that the required consumables and drugs are ready.

Let us all embrace this transition for safer, faster, and better-coordinated surgical care at UNTH.

Signed,

Director, Theatre Complex

University of Nigeria Teaching Hospital (UNTH)
